Catalyst Systems Corporation Recognized by SD Times as an Industry Leader and Innovator in Build Management

Catalyst Systems Corporation receives 2006 SD Times 100 Award

ORLANDO, FL—June 4, 2006—Catalyst Systems Corporation, creator of the Openmake build management software and technology leader in build configuration management workflow, today announced receipt of the SD Times 100 Award for excellence and leadership in the Build Management category. The award titled "SD Times 100" recognizes leaders and innovators of the software development industry for 2005 in 10 separate industry segments.

"The winners of this year's SD Times 100 awards have demonstrated their leadership in shaping the software development industry," said David Rubinstein, editor-in-chief of SD Times. "We took into account each nominee's products and services, its reputation among development managers and the new ideas it brought out. These select individuals and organizations are the ones we've identified as helping to move the art of development forward."

SD Times editors commented on Openmake's achievement, noting, "Thanks to Openmake, build management has moved beyond make-file scripting to full-fledged workflow that takes charge of just about everything. It's a real catalyst for change."

This SD Times 100 award is an important achievement for Catalyst Systems Corporation because it was the first year that SD Times recognized Build Management as a distinct category. "We take builds seriously and we're

—more—

happy to see that the industry is finding builds important as well. We appreciate SD Times' vision in defining a category specific to Build Management. We are proud to be one of the first organization recognized as a leader and innovator in this emerging market segment," said Tracy Ragan, CEO, Catalyst Systems Corporation.

About SD Times

Launched in February 2000, BZ Media's SD Times is the newspaper of record for the software development industry. SD Times is published twice monthly in identical print and digital editions and can also be read online at www.sdtimes.com.

About Catalyst Systems

Catalyst Systems Corporation is the leading provider of Build Configuration Management Workflow technology. Catalyst Systems has specialized in the design and implementation of reliable and repeatable application build processes for Global 2000 organizations since 1995. Openmake, Catalyst Systems' flagship product, enables development teams to get back to the task of writing high-value business applications by minimizing the task of writing low-value build scripts through Openmake 100% reusable framework.
